

# Activity brief for parent

## What is Plastic Fishing?

Students step onto a Plastic Whale boat and head out onto the canals together. Equipped with nets and gloves, they fish plastic from the water - turning a problem into action.

Along the way, they discover how small actions can make a big difference for nature. And that it is fun to care for nature together!

## Is it safe?

Yes. Safety is always our priority. Each boat board on average 9 students and is guided by an experienced Plastic Whale skipper and a school supervisor. Children up to 12 years old wear life jackets (over rain jackets if needed). Children remain in the boat at all times.

## What if the weather is bad?

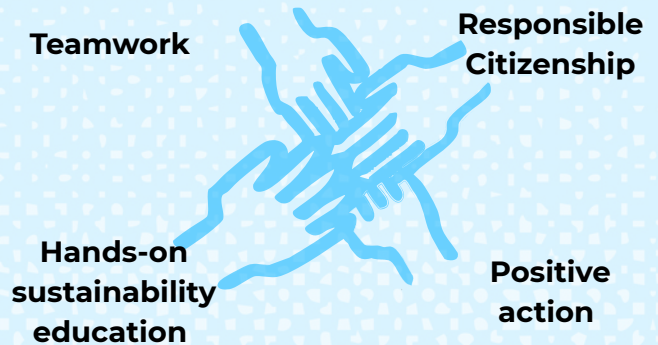

Usually light rain is not a problem. If weather conditions become unsafe, we will contact the school to arrange an alternative date.

## What happens to the waste?

The collected waste is sorted together with the students. This helps them understand how recycling works and how waste can become a valuable resource!

## What students will learn?

## What should children bring?

A bottle of water

Sunscreen or sunglasses (in summer)

Weather-appropriate clothing (hat and/or rain jacket)

A sense of adventure. Getting a little wet or muddy can happen!

## Did you know?

Plastic Whale boats are electric and made with recycled PET bottles. The plastic used to build the boats was partly collected from Amsterdam's canals.
